- ❖ Maintain world-class quality with a modern approach.
- ❖ Provide world-class output while minimizing costs.

## **INTRODUCTION**

Njuca Consolidated Company Limited is one of Kenya's leading Construction Companies and one of the few fully integrated engineering contractors enabling it to compete with internationally recognized contractors.

Our organization and operation structures relate to all development sectors ranging from infrastructure, to mining, to agriculture and structural works. As such we are able to compete favorably to benefit our clients who include the Government, Parastatals, Public and Private sectors as well as NGO's.

## **HISTORY**

Armed with ideas and zeal to conquer the construction industry, Njuca Consolidated Company Limited was established in Kenya on 27<sup>th</sup> September 1979, when it was given its certificate of Incorporation. At inception, it was a small idea mainly dealing with small-scale engineering works of welding, and electrical repairs. At the time it commenced its operations, the company was based at Makuyu, Muranga district.

In the 1980's the company's main operations included manufacture, repair, and maintenance of coffee milling machinery like; engines, motors, water pumps and pulping machines. Repair services involved the shot blasting of coffee grinding metal discs and plates. Thereafter, the company diversified to construction of tea factories. The first factories it built were Gacharage and Nduti in Muranga District. It also undertook electrification and renovation services.

In the late 90's the company began to undertake construction of roads, residential houses and commercial buildings. Since then, we have never looked back or lost track on our ambition in business.

The business is a closely held institution incorporating the best techniques available to maintain a balance between the line of business it is involved in, the hopes and aspirations of the Njuca community and a healthy return on equity. Currently, Njuca is involved in Building and Construction, Civil Engineering, Electrical Engineering, and Woodwork Engineering.

While our head office is based in Thika, Kiambu County, we have over the past few years completed projects in some of the other counties in Kenya. We currently have a branch office in Mombasa. The company still remains flexible having successfully completed projects in some of the most remote parts of the country.

## **OUR PROJECTS**

Since its incorporation, Njuca has undertaken and successfully completed more than 60 projects, all of various constructions, and in different provinces/counties in the country, which have made a great impact to the Kenyan economy. Throughout the years of our existence, we have re-organized and diversified our business and achieved success in the execution of the strategic initiatives that we set to accomplish.

We have acquired a reputation for supporting and ensuring the successful completion of each project tackled, with the aim of completing before the contract completion period. In all our projects, we have proved a practical hands on approach coped with adaptability, resilience, and leadership, with determination and commitment of the highest standards.

All our operations and transactions are guided by the drive to provide quality service and products at all times. Quality defines our past and is charting a course into our future. We can proudly proclaim that for the last five years we have undertaken contracts worth over 7 Billion Kenya Shillings. Our ongoing and successfully projects are a proof of our client's confidence in us as well as our mettle to deliver quality products.
